

Carbon border tax, controlled

CBAM requires certificates for greenhouse gas emissions in imports of steel, cement, aluminum, fertilizer, electricity, and hydrogen. We track shipments, calculate emissions, and manage certificate purchases.

COMPLIANCE

Workflow tools, datapoints, reports.

ACADEMY

Training, certificates, exam.

What you get

- ✓ Import query by sector and origin
- ✓ Embedded emissions calculation (actual + default)
- ✓ Certificate purchase and quarterly settlement
- ✓ ERP integration for automatic shipment data

Use case

A steel importer uses LexiCompliance CBAM to track 5,000 shipments per quarter, calculate embedded emissions based on supplier data, and automatically settle certificates – without manual processing.
